Country Cross Stitch Kits Rule OK!

Print out this page, check the scale & if it is OK cut out the stitch counters.

Hold the appropriate edge up to your work to quickly count the number of stitches in a row or the gap between stitches.

Tip: Make your stitch counter more sturdy by either sticking it to a piece of card, printing it on card or laminating it.

Please check one of the scales on the left (cm or inches) against a ruler before using your stitch counter for the first time.

Incorrect Scale: if the scale of your print out is incorrect try selecting 'Page Scaling' = 'None' when you print.

Please note that this stitch counter is intended as a guide only and you should check any work thoroughly.
